# PARADIGM

mobile

**Paradigm Mobile** is an extension to our Paradigm Clinical software, which gives dental offices the tools to access the appointment book remotely and elevate their patient communication. We are HIPAA compliant as we know the security of patient data is of the utmost importance.

Streamline your communication with automated text messages and emails for appointment confirmations, reminders and more, so that you save time for handling tasks at the office.

**Paradigm Mobile** is fully integrated with your Paradigm database, giving you the flexibility to customize mailing lists and enhance your marketing efforts to increase your bottom line.

# INTELLIFORM

## virtual forms

Intelliform is a big step forward for the offices who want to go paperless. Not only does it declutter your office, but it also streamlines your registration process to create a better patient experience and help you save time.

Sending online forms to new patients before their first visit will reduce waiting times. Additionally, having this information available for your service providers earlier also better prepares them for a steady workflow.

The patient information is automatically integrated with Paradigm Clinical as soon as patients finish entering their information. This helps eliminate redundant tasks and reduce human errors that result from manually inputting data.

As the data is stored on Paradigm's encrypted database, offices can be confident that the information is kept safe and secure

# REVIEWS

and surveys

We want to help dentists increase their patient base and continue making improvements to their services to best suit their patients' needs.

Dental offices with great reviews and high ratings will draw more new patients. Let happy patients tell others with a positive review. Easily send a link by SMS through Paradigm Mobile to make it convenient for them to do so.

Patients can also give the office feedback directly through Surveys. Get insight on the status of your practice and staff conduct, and identify areas that need improvement to better serve patients.
